

Please see P1.py file for code.

Solution:

$$A_{12} = 1.9584$$

$$A_{21} = 1.6892$$

$$\text{Loss} = 0.6701912$$

Solution is obtained after 941 iterations of gradient descent with a step size of 0.0001 and a convergence criteria of 0.001 (norm of the gradient).
